## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2, 4, and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Silverbrook (US 6443555) in view of Torgerson (US 6722759).

#### **Silverbrook discloses the following claim limitations:**

As per claim 5: a body (figure 15, element 61) configured for user insertion and removal from a complementary cradle in an inkjet printer (figure 3, element 56); printing fluid storage (figure 11, element 6); a pagewidth printhead having a first print chip and a second print chip; and a fluid connection between the printing fluid storage and the first and second print chips.

As per claim 2: the first and second printhead chips abut together (figure 19).

#### **Silverbrook does not disclose the following claim limitations:**

As per claim 5: the length of the first print chip added to the length of the second print chip is at least equal to the length of the pagewidth printhead (see figure 2).

As per claim 2: the first and second print chips abut together to extend the length of the printhead (figure 2, element 181).

Art Unit: 2853

As per claim 4: electrical connectors (figure 2, element 74) located at opposing ends of the printhead and in electrical communication with the first and second print chips (column 5, line 43-column 6, line 2).

***Response to Arguments***

Applicant's arguments with respect to claims 2, 4, and 5 have been considered but are moot in view of the new ground(s) of rejection.
